Jewelry Design Cycle

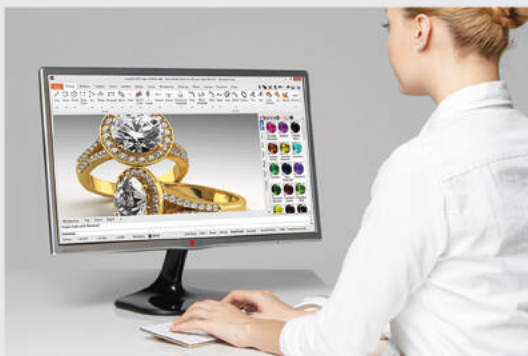

The Rexcan DS3 will save jewelry CAD designers and manufacturers at least 50% of their time for designing and producing very complex-shaped jewelry pieces.

1

> Jewelry 3D Scanning

Manual measurement is no longer required. Using the highly advanced and fully automated DS3, the gem is scanned easily and quickly.

2

> Jewelry Design

An enormous amount of time is saved for CAD designers using the precise 3D data of the gem. And STL format support all RP machine.

3

> 3D Printing & Perfect Fit

Quickly and precisely turn any jewelry items into CAD/CAM data for modification, mold & tool making and 3D-printing in a cost-efficient way.

Finally, The gem is perfectly placed into the designed piece of jewelry!
